

# SCX IS COMPETITION AND ADVANCED TECHNOLOGY

**NEW TRACK**

**Track:** the SCX NEW TRACK, developed using high quality and resistant materials, is wider and more stable. This allows a better grip and a better performance of your cars in the track surface. Moreover, its new couplings enable an easy and quick set up.

**Hand Throttles:** designed for the best ergonomic adaptation to the hand; and developed with a good balance in the gear acceleration curve that allows players better control in managing the speed of the cars.

**Electronic Transformer:** SCX uses the best components to guarantee the highest energy efficiency, resulting in low energy consumption.

**Accessories:** SCX offers a wide range of accessories for your cars and track layouts, adding more excitement, and fun alternatives for each race.

## Cars with the most developed technology and performance

**Automatic Return System (ARS) Guide:** With the ARS feature, exclusive to SCX cars, the guide comes back to its original position automatically, making it easy and fast to replace the car on the track.

**Removable and Adjustable Magnet:** This feature, which is exclusive to SCX cars, allows the adjustment of the magnet in the car to the surface of the track, allowing competitors to tune their car's performance to their racing style.

**Motors:** SCX has developed a wide range of high quality motors with the best performance for your cars: you can choose your motor according to your circuit requirements and driving style.

**Tilting Chassis:** this feature allows the car to adapt to the surface of the track, significantly improving its performance.

**High Intensity Headlights:** For cars with headlamps, the Xenon effect of the lights offers more spectacular racing excitement and reality for your races.
