

# SCX<sup>®</sup>

1:32 scale racing system

## SCX New track

### DIGITAL-COMPATIBLE TRACKS

The new tracks can easily be used with the digital system, opening up a wide range of possibilities for you to enjoy much more realistic motor races. All these new performance make the digital system much more interactive because they allow you to do all this:

- Race with up to 6 cars at a time on a single 2-lane track.
- Real overtake from either lane.
- Plan race strategies including changing lanes, taking bends on the inside and stopping opponents from overtaking by getting in front of them and blocking them.

### CONVERTER TRACK

The new circuits can be combined with the whole range of SCX 1/32 tracks and circuits sold up to now, thanks to the converter tracks specially designed for this purpose.

### EASY TO SET UP TRACKS

The new track system makes it easier to set up circuits thanks to its new couplings, which will enable you to save set-up time and start racing quickly.

### TRACKS WITH HIGER PERFORMANCE

The new track system, while keeping to the high quality standards that characterise all SCX tracks, offers the following improved performance:

- Plastic side protection in the slots to improve the improvement and direction of the car's pick-up guide.
- Wider, more stable tracks, allowing more precise, efficient driving.
- Technical features to add flexibility and robustness to the set-up of any circuit.
- New surface for maximum grip and evenness, to improve the vehicle's dynamic performance on the track.
